

Events

1. EVENTS - home

a. Calendar shows dates during which events are happening

i. Found these snips:

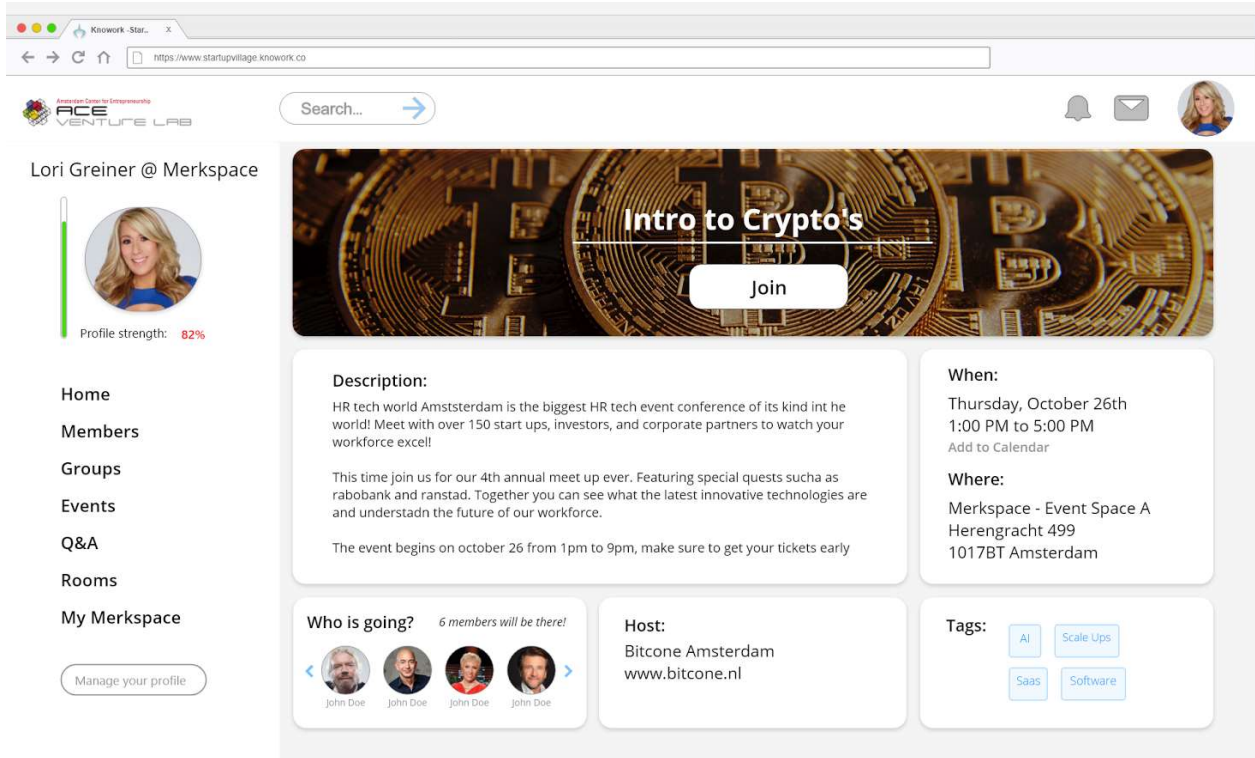

1. <http://blog.w3cub.com/vue2-calendar/>
2. <https://github.com/jayZOU/vue-schedule>
3. <https://bootsnipp.com/snippets/g00x1>
4. <https://wikiki.github.io/components/calendar/>

The screenshot shows the Krowork website interface. At the top, there's a navigation bar with the Krowork logo, a search bar, and user avatars. The main content area is divided into several sections:

- User Profile:** Lori Greiner @ Merkspace. Profile strength: 82%. Navigation links: Home, Members, Groups, Events, Q&A, Rooms, My Merkspace. A button "Manage your profile" is at the bottom.
- Events and workshops happening soon:** A section titled "Today" with a filter for "All Locations". It lists two events:
 - Intro to Crypto's:** Hosted by Colin from Bitcone. Where: Merkspace Amsterdam, MR 2. When: 19:00, 9/12/17. A "Join!" button is present.
 - Sales Hackers AMS:** Hosted by Freelance Masterminds. Where: Merkspace Amsterdam, MR 2. When: 19:00, 9/12/17. A "Join!" button is present.
- January:** A section titled "React.js meet up". Hosted by react society. Where: Merkspace Amsterdam, MR 2. When: 19:00, 9/12/17. A "Join!" button is present.
- Events:** A section with the text "Have a great idea for an event? Fill out the form below and start planning it with your community manager!" and an "Add new event" button.
- Events this month:** A calendar for March 2017. The calendar shows dates from 26 to 31. The date 4 is highlighted with a green circle, indicating an event.

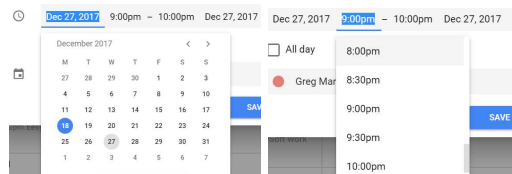

2. MORE INFO ABOUT EVENT

- Once event is selected

3. ADD AN EVENT

- Name
- Description

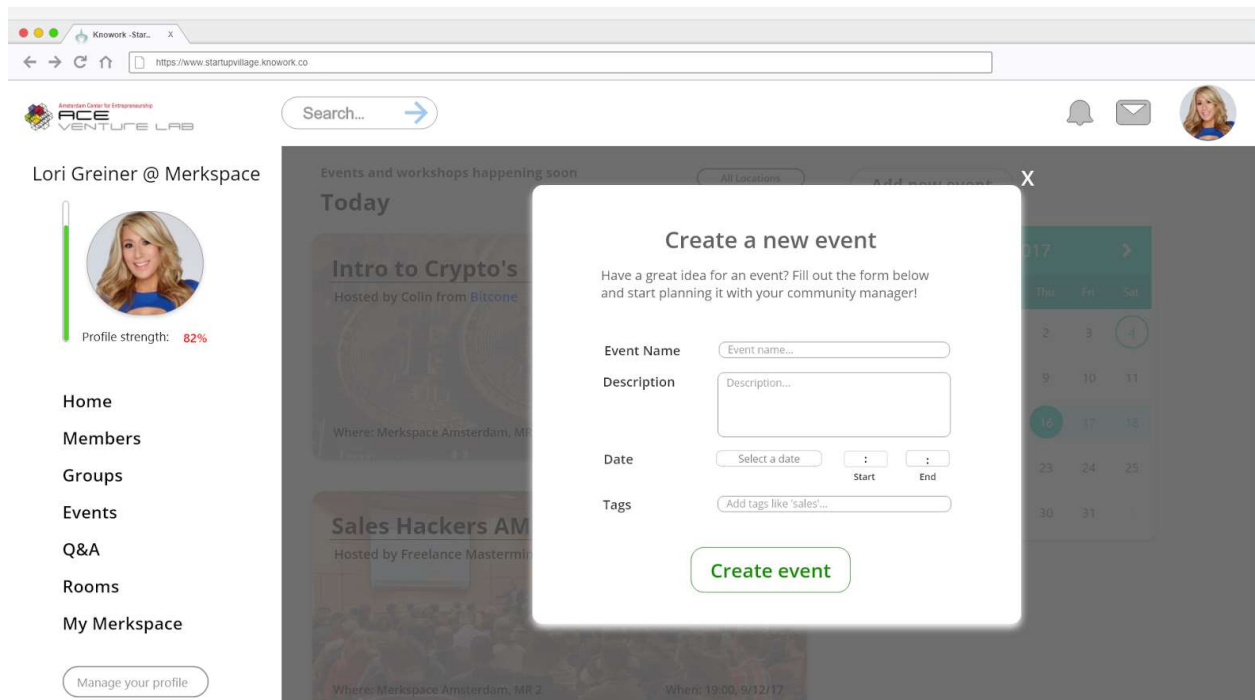

- Date (can be like google calendar:

- Tags - show up below tags input

-

→ USER CAN ONLY REQUEST TO HAVE AN EVENT

- Event requests go to admin page - where they have final authority about the event and can add location etc (this page still needs to be designed on the backend)
